PROFESSIONAL SUMMARY

Full Stack & AI Developer with 3 production-deployed applications built using Python, LangChain, RAG, and the MERN stack. Proficient in LLM integration (OpenAI, Gemini), REST API development, vector-based semantic search, and end-to-end web application development. Seeking SDE or AI Engineering internship and full-time roles.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, TypeScript, SQL, C
Frontend Development:	React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3
Backend Development:	Node.js, Express.js, Mongoose, FastAPI, REST APIs, JWT
AI and Machine Learning:	LangChain, RAG, LLMs, Embeddings, Prompt Engineering, OpenAI API, Gemini API, Vosk STT
Databases:	MongoDB, MySQL, Vector DB, Pinecone

WORK EXPERIENCE

Freelance Shopify Developer

Jun 2026

Independent / Contract

Tech Stack: Node.js, Express.js, Shopify Admin REST API, Vanilla JavaScript, ngrok

- Architected a custom Shopify application enabling dynamic, **ZIP code-based product pricing** by connecting a Node.js backend to the storefront via the **Shopify Admin REST API**.
- Engineered a **RESTful API** endpoint to process destination ZIP codes and apply regional pricing rules, handling distinct price outputs for 3+ geographic zones.

PROJECTS

Re-Con — AI-Powered E-Commerce Platform

Oct 2025 – Feb 2026

Tech Stack: React.js, Node.js, Express.js, MongoDB, Cheerio, Vosk STT

- Built **RESTful APIs** with Node.js and **Express.js** handling 10+ endpoints for user authentication, product search, and price aggregation.
- Implemented automated web scraping using **Cheerio** to extract product names, prices, and ratings from multiple e-commerce websites in real-time.
- Integrated **Vosk Speech-to-Text** engine for hands-free voice search, achieving 85%+ accuracy with a custom vocabulary of 2000+ product terms.
- Designed **MongoDB** schemas for user management, product catalog, and price history, optimizing query performance with indexing.
- Live Demo: <https://recon-ai-bhly.onrender.com/>

DocMind — AI Document Question Answering System

Feb 2026 – Mar 2026

Tech Stack: Python, LangChain, Vector DB, Hugging Face, Streamlit

- Built a **Retrieval-Augmented Generation (RAG)** pipeline that processes PDF documents and answers queries with context-grounded responses, reducing hallucination by ~40% vs. raw LLM output.
- Implemented **recursive text chunking** (1000 tokens, 200 overlap) and Hugging Face embedding generation for 500+ page documents.
- Stored and indexed document chunks in **Vector DB**, enabling sub-second **semantic search** across 200+ vector embeddings.
- Developed a **Streamlit** chat interface supporting multi-turn conversation, source citation display, and real-time response streaming.
- Live Demo: <https://docmind14.streamlit.app/>

CityMind — Intelligence City Assistant

Apr 2026 – May 2026

Tech Stack: Python, LangChain, Mistral AI, Tavily API, OpenWeatherMap API, Streamlit

- Architected an autonomous **AI agent** using **LangChain** and Mistral Large, leveraging native **LLM tool-calling** to dynamically select and execute external functions based on user intent.
- Utilized the **@tool decorator** to wrap Python functions into structured tools, enabling the agent to autonomously trigger **REST API** calls to **OpenWeatherMap** and **Tavily** for real-time data retrieval.
- Engineered a custom **Human-in-the-Loop (HITL)** middleware using **wrap_tool_call** to intercept function execution, enforcing manual user approval before any external API call is processed.
- Live Demo: <https://citymind.streamlit.app/>

EDUCATION

Bachelor of Technology in Computer Science and Engineering

KCC Institute of Technology and Management, Noida, Uttar Pradesh
Sep 2022 – May 2026 | **CGPA:** 7.9/10.0

CERTIFICATIONS AND ACHIEVEMENTS

- Deloitte — Data Analytics Job Simulation, Certificate of Completion — Forage (Jul 2026)
- Datacom — Software Development Job Simulation, Certificate of Completion — Forage (Jul 2026)
- Tata Group — GenAI Powered Data Analytics Job Simulation, Certificate of Completion — Forage (Jul 2026)
